HAND INSTRUMENTS

CUTTERS

Hard Wire Cutter with T.C.
- Extra strong edges
- Cuts archwires up to .022 x .028
- Features a 15° cutting angle for easy intra-oral access
- Tungsten carbide inserts

G001

Pin and Ligature Cutter with T.C.
- Cuts wire up to .015 on 15° angle
- Fine tips to easily access hard-to-reach areas
- Cuts wire ligatures, pins and elastics
- Tungsten carbide inserts

G002B

Mini Pin and Ligature Cutter with T.C.
- Cuts archwires up to .015
- Fine tips to easily access hard to reach areas
- Cuts wire ligatures, pins and elastics
- Tungsten carbide inserts

G002

Small Distal End Cutter with Safety Hold with T.C.
- Compact tip for easy access
- Plier shear cuts hard wires close to the buccal tube and holds loose wire
- Cuts archwires from .014 to .021 x .025
- Tungsten carbide inserts
- Longer handles available

G003 - Standard Handle
G003L - Long Handle

BENDERS

Three Jaw Plier
- Precision tips for accurate wire and clasp adjusting and contouring
- Excellent for bending orthodontic appliances
- Superior strength for wires up to .030

G004

Flat-on-Flat Plier
- Stubby, square beaks; .045 at tip and parallel at 1 mm opening
- Easily bends and forms wire up to .050

G005FF

Bird Beak Plier
- Versatile plier for working with round wire up to .030
- Round and pyramid beaks are smooth to prevent scoring
- Can be used to form springs

G005RF

NEXADENTAL is pleased to offer a new line of ORAPRO® orthodontic cutters, benders, and utility instruments.

ORAPRO® instruments are forged from the highest surgical grade German stainless steel and follow an unyielding quality control system throughout the manufacturing process. Every instrument is inspected carefully for function and results before it leaves the manufacturing facility.

These instruments are lightweight with a comfortable fit and feel in the hand. With proper care and maintenance, they will perform exactly as expected every use. We offer a strong warranty for three years on material and function and five years for rust and corrosion.

ORAPRO® instruments come packaged in a clear, plastic pouch for easy storage and visibility. We are proud of these new products and are happy to offer them to our customers, further extending the ORAPRO® brand.

NEXADENTAL is pleased to offer a new line of ORAPRO® orthodontic cutters, benders, and utility instruments.
BENDERS CONT’D

Light Wire Plier
- Designed for working with small wires and forming wire springs
- Tapered beaks make it easy to bend small diameter loops
- Bends wires up to .020

G006

Omega Loop Forming Tweed Plier
- Concave beak is contoured for making uniform Omega loops with ease
- Rounded beak has three sections of .045, .060, and .075 in diameter and .090 in length

G014

Lingual Arch Forming Plier
- Forms double-back and triple-back bends in .030 and .036 wire
- The double-back forming groove is close to the plier joint to assure that adequate “flattening” is accomplished.

G018

Light Wire Plier - Groove Tip
- Fine tipped round and square beaks feature a precise .010 groove
- Allows consistent forming of archwire loops and bends
- Firmest grip possible
- Light wires up to .020

G006G

Ball Hook Crimping Plier
- Designed to crimp auxiliary stops, hooks, posts, and archwires
- Angled beak allows for precise placement of hook on archwire

G016

Distal Bender
- Equally effective for cinch backs and straightening distal ends for quick removal of archwires.

G147S Round Archwires
G147L Rectangular Archwires

Rectangular Arch Forming Tweed Plier
- Handles square or rectangular wire
- Working edges are carefully beveled to prevent wire scoring
- Excellent design for putting torque in archwires
- Bends wires up to .022 x .028

G013

Nance Loop Forming Plier
- Four steps (3, 4, 5, and 6 mm) allow precision loop forming
- One beak is precision serrated to prevent wire slippage
- Edges are beveled to prevent wire damage

G017
### HAND INSTRUMENTS

#### Instruments

- 10% | 10+ instruments

*Discounts do not apply to clearance items.*

#### UTILITY

**Weingart Plier**
- Serrated tips hold wires firmly at a convenient working angle
- Tapered beaks fit easily between brackets and hard-to-reach areas

G007

**Posterior Band Remover**
- Designed to safely and easily remove posterior bands
- Long tip

G008

G198 3/16" Replacement Pads

**Separating Plier**
- Stretch separating elastics for ease of placement between tooth contacts
- Curved beaks for easy use in posterior segments
- Autoclavable up to 370°F/188°C

42-P-50

**How Utility Plier - Straight Tip**
- Matching serrated pads assure a firm, positive grip
- Rounded tips for patient comfort and safety
- 3/32" diameter pads

G009

**Direct Bond Bracket Remover**
- Precision grooved tips wedge between the bracket base and the tooth surface to safely and easily remove brackets
- Wide remover tip

G010

**How Utility Plier - Curved Tip**
- Efficient utility plier with serrated beaks for a firm grip
- The 45° angled tips allow access for hard-to-reach areas

G009A

**Separator Plier with Adjustable Stop - Reverse Action**
- Angulated beaks for accessibility, ease and accuracy
- Grooved beaks assure positive hold for positioning elastics

G144

**Aluminum Height Gauge**
- Precisely measures height of bracket from the incisal edge.

G180 .018 - 3.5, 4.0, 4.5, 5.0 mm

G182 .022 - 3.5, 4.0, 4.5, 5.0 mm

**Boone Gauge**
- Accurately measure height of bracket placement from incisal edge. 3.5, 4.0, 4.5, and 5.0mm.

G180

**UTILITY CONT’D**

**Dontrix Gauge**

Highly accurate gauge for measuring the force of elastics and springs.

G183

**Mathieu - Regular Tip**

- Needle holder with serrated tips
- Locking ratchet permits instant opening and closing
- Holds firmly without tearing

G143

**Band Seater/Scaler**

The band seater has a serrated tip for contouring and seating of bands. The other end is a scaler to aid in removing excess cement.

G152

**Swivel Head Bracket Positioner**

- 3.5, 4.0, 4.5, 5.0 height measurements
- Adjustable for use on anterior and posterior teeth
- Hinged tip adjustable to 45°
- Use with .022 and .018 brackets
- Autoclavable up to 370°F/188°C

42-BP-69SH

**Mathieu - Fine Tip**

- Needle holder with serrated tips
- Locking ratchet permits instant opening and closing
- Holds firmly without tearing
- Tapered tip

G143F

**Scaler**

Single ended scaler can be used to check for excess cement during banding and allows for easy removal of elastomeric ligature ties.

G167

**Mosquito Hemostats**

- Serrated tip for easy placement of elastic ligatures

G142C Curved Tip
G142 Straight Tip

**Mathieu - Smaha Tip**

- Excellent for placing elastic ligatures
- Finest tip available
- 5 1/2”

G143S

**Cement Spatula**

Flexible spatula for mixing cements. Polished surface makes clean up easy.

G153

Discounts do not apply to clearance items.

Buccal Tweezer

Fine tip tweezer for easy placement of buccal tubes.

G145

Standard Bracket Holder

Reverse action holds brackets and tubes without finger pressure for easier bonding.

Autoclavable up to 370°F/188°C.

42-BH-48

Perry College Plier

Angled serrated tip is designed for removal of cotton and gauze pads from the patient’s mouth.

G149

Reverse Action Buccal Tweezer

For easy placement of buccal tubes.

G145R

Fine Tip Bracket Tweezer

- Fine, angled tips for precise positioning
- Reverse action
- Autoclavable up to 370°F/188°C

42-BT-56

Orthodontic Tweezer

Locking mechanism and 15° angled tips.

G141

Bracket Tweezer with Height Gauge Blade

Reverse action bracket tweezer with fine tip to hold bracket secure. The millimeter marked blade makes bracket alignment easy. Also offered without height gauge.

G148MB

G148 Without height gauge

Bracket Tweezer with Micro Tip

Reverse action bracket tweezer with fine tip for easy placement.

G148M

Explorer

- Double ended
- Use to remove elastic chain and ligature ties
- Tempered stainless steel
- Autoclavable up to 370°F/188°C

42-E-72

**UTILITY CONT’D**

### Ligature Tucker
One straight end and one angled end for tucking ends of steel ligatures. Works around and between any bracket style.

G151

### Elastic Ligature Remover
This double ended elastics remover makes archwire changes a cinch. Fine pointed ends slip easily under ties for quick removal.

G150

### Mershon Band Pusher
Angled serrated tip. Lightweight, hollow handle. Cold sterilizable.

G162

### Iris Scissor
Short, extremely sharp blades that taper to fine straight or curved tips. 4.5”

G172S Straight Tips

### High Heat Bite Stick
Molded, high impact plastic with stainless, metal serrated tip. Safe for dry heat sterilizers.

G171

### NiTi Chilling Instrument
Use this lightweight wand to chill and instantly soften Thermal NiTi archwires for faster, easier engagement.

G160

### Force Gauge Dynamometer
- Precisely measures forces exerted by elastics, archwires, and coil springs
- Double-ended calibrated shaft

42-FGD-352

### Cold Sterilizable Bite Stick
Our economical bite sticks feature serrated stainless steel tips and flexible plastic handles. Available in blue, red, purple and teal.

G170*

* Insert the first letter of desired color here.

### Convertible Cap Remover
For easy removal of convertible caps on molar tubes.

G168

G169 Replacement Blades
10/pack

HAND INSTRUMENTS FROM PREMIER DENTAL

Look below for diagnostic and hygiene instruments from Premier Dental, including probes, explorers, scalers and more.

PREMIER EXPLORERS

Cavity Finder™ Explorers

Multi-piece construction of Premier stainless steel Cavity Finder explorers, ensures optimal tactile sensitivity. Cavity Finder tips are extremely sharp and flexible, for maximum effectiveness in detecting caries and calculus. Available in popular designs.

P-1003523 ................ CF 5
P-1003529 ................ CF 11/12

PREMIER PROBES

PerioWise “The Friendly Probe”

Ideal for full examination or a quick screening. Easy-to-read 3 mm green band indicates periodontal health. Reaching a red mark indicates the possible presence of periodontal disease. Safe around implants. Autoclavable.

P-9006102 ................ Original
P-9006104 ................ 3-6-9-12
6 probes/pack.

P-9006105 ................ Original
P-9006106 ................ 3-6-9-12
12 probes/pack.

Probes

P-1003689 ............... Probex YO 9 CC
PREMIER SCALERS

The Big Easy Ultralite Scalers

If you are a dentist or hygienist performing routine scaling procedures, we know you are concerned about repetitive motion injuries. That is why Premier has created Big Easy Scalers.

- Cushion grips are resilient, providing passive feedback so you use less pressure.
- Thicker, softer, sculpted medical-grade silicone grips cushion your fingers.
- Thin, sharp blades and precise angles offer optimal efficiency.

Scalers Sickle, 204 Series, McCall

Available with The Big Easy Ultralite handle. Advanced technology polymer handle with medical-grade silicone grips offers exceptional lightness and durability.

P-05601............................Gracey 1/2
P-05607............................Gracey 7/8
P-05611............................Gracey 11/12
P-05613............................Gracey 13/14

P-05625...............................H-204 S
P-05639.............................McCall 13S/14S
P-05641.............................McCall 17S/18S
PREMIER PLEIRS AND FORCEPS

**Forceps** Child Size

Child size forceps are approximately 65% the size of adult forceps, and can be easily concealed from the patient.

- P-9065057............................ C150
- P-9065058............................ C151

PREMIER ULTRASONIC INSERTS

**Big Easy Ultrasonic Inserts**

Big Easy cushion-grip ultrasonic inserts for improved ergonomic grip and comfort

- Ergonomically designed large 7/16” diameter for maximum comfort and decreased fatigue.
- Compatible with most magnetostrictive handpieces.

- P-1005300............................. 25K

PREMIER MISCELLANEOUS INSTRUMENTS

**Mirror Handles** Cone Socket

- P-1003582....................... Mirror Handle

**Amalgam Carrier** Regular/Large

- P-9062201.................... Amalgam Carrier
**MicroEtcher™ IIA**

Intraoral Sandblaster

22005-01

The MicroEtcher IIA is recognized as one of the most valuable tools for dentistry. It provides precise surface micro-roughening usually in just a few seconds, improving bond strength up to 400%. Surface area and surface reactivity is dramatically increased for maximum bond. The MicroEtcher IIA is all stainless construction with a replaceable carbide tip. The jar lid is permanently affixed and has a spill resistant abrasive filter. Finger button control.

The patented nozzle configuration is slimmer in profile allowing greater visibility during intraoral use, can rotate 360°, and is interchangeable with the Microetcher II nozzle options. The Microetcher IIA is designed to limit abrasive use in order to minimize dust in your operatory.

- Fully autoclavable body and nozzle
- .032 Nozzle (360°), 9" airline, two abrasive jars
- Effective at pressures as low as 45psi
- 30% reduction in abrasive use
- Ergonomically designed nozzle to improve intraoral vision
- Precise control for intraoral use
- Rapid bonding prep with failures greatly reduced
- Ideal for orthodontic and other appliances
- One year warranty

**MicroEtcher™ CD**

Intraoral Sandblaster with Custom Disconnect

201935-00.......................... Sirona
201936-00.......................... KaVo
93825................................. BIEN-AIR

The MicroEtcher CD offers the same great performance and all of the features of the MicroEtcher IIA, plus a custom disconnect at the rear that allows you to plug the unit directly into your Sirona, KaVo or BIEN-AIR handpiece connector.

- Etching all metals, composites & amalgam
- Aiding in intraoral porcelain repair
- Prepping for pit & fissure restoration
- Cleaning dark grooves to reveal decay
- Prepping incipient lesions and minor class I & V
- Debriding bur preps for best esthetics & bonds

**II Nozzle 201802-00**

For use with MicroEtcher IIA and MicroEtcher CD. New smaller .032” tip is ideal for intraoral applications (pit & fissure preps or porcelain repair) as it reduces the amount of dust and provides for a more focused pattern of abrasive. Autoclavable.

**Orthoprophy™ SA-85**

85 micron Soft Alumina

14001............................... 1lb.

**Aluminum Oxide**

50 micron

15301............................... 1lb.

Orthoprophy SA-85 micron works with the MicroEtcher line to remove orthodontic resin, pit and fissure resins, ceramic bracket cement, and temporary cement without damage to enamel. Aluminum Oxide 50 micron white works with the MicroEtcher line and can be used on any surface.

**SANDBLASTING ABRASIVES**

Medical grade alpha alumina. Particles are precisely sized and desiccated for an even flow and an efficient cut for clog-free, consistent air flow.
LAMPS AND LIGHTS
We service nearly every make and model in the dental care industry!

LED Blast Fast Curing Light
The LED Blast fast curing light utilizes a chip-on-board LED module to create exceptional performance.

LED technology eliminates costly halogen bulbs and reduces heat buildup. The new LED Blast cures in less than 10 seconds with 1000 to 1300 mw/cm² of continuous power. Comes complete with 11mm autoclavable light guide, anti-glare shield, and charger base with power supply. Long life batteries allow use all day and provides 750 five-second cures with an overnight charge. Timing cycles of 5, 10, 20 and 30 seconds. Ergonomic pistol shape can be used with either hand.

LB001.......................... LED Blast
L009-7000............ Hilux Light Meter

LIGHT GUIDES
M014-01.................... 3mm, 60 deg
M011-24.................... 8mm, 60 deg
M015-24.................. 11mm, 60 deg

Blast™-Lite and Mini-Blast™
Wand shaped lights such as the Blast™-Lite and Mini-Blast™ are smaller and lighter than most hand-held curing lights, ideal for quick procedures. Both high power lights are equipped with timer settings of 5, 10 and 20 seconds. Included are long lasting Lithium-Ion batteries for extended use. Removable glass tip does not require a sleeve and can be sterilized, metal case allows for easy cleaning.

LB005........................ Blast™-Lite
LB006........................ Mini-Blast™
